Preface	3
Greetings	4
The aims of the publishing	8
 Original papers	
Gy. Nagy, L. Kiss, L. Szabó: Rapid control of the radioactive concentration in milk samples	11
A. S. Szabó: Determination of boron content in vegetables using an INAA method	23
 Short communications	
J. Kispéter, Zs. Rózsa, L. Kiss, J. Beczner: The investigation of foodstuffs by thermoluminescence method	35
J. Felföldi, M. Lénárd: Possibilities and advantages of supplying intelligent measuring systems in food industry	47
 Global reviews	
K. J. Kaffka: Results achieved in applying NIR spectroscopy in different field of agriculture and food industry in Hungary	53
A. S. Szabó: Natural radioactivity of the foodstuffs	65
 Events	
ESNA Conference, 1987	81
Symposium of irradiation technique	89
National workrooms of the food physics: Food Physics Department of the Central Research Institute of Food Industry	95
Review of the home press	97
Abstracts	97
Conversation with J. Farkas	99
 Information for the authors	 110

CONTENT
1988/2

Editorial	3
 Original papers	
S. Barabácssy, J. Farkas: Differential Scanning Calorimetry of Spice Samples	5
Zs. Mednyánszky, A.S. Szabó, J. Simon: Effect of X-ray irradiation and special light-technique treatment of the preservation of vegetables	15
 Short communications	
M. Rosza: Determining Egg, Fat, Protein and Water Content of Pastry Products by the NIR Technique	25
A.S. Szabó: Calculation method of ^{89}Sr and ^{90}Sr activities in food samples	35
 Global reviews	
G. Ember: Research and development in the food industry	43
A.S. Szabó: Radioactive contamination of the food-stuffs (before Chernobyl)	61
 National workroom:	
University of Horticulture and Food Industry, Faculty of Food Industry, Szeged	79
 Events	
NIR technique symposium, Moscow	83
ESNA Conference, 1988	85
Scientific meeting on methods in Food Rheology	89
7 th International Meeting on Radiation Processing	97
Abstracts	
Conversation with K. Kaffka	105

 RADIATION TECHNIQUE
 IN THE AGRICULTURE AND FOOD SECTOR
 3rd Symposium University of Horticultural and Food Industry, Budapest
 13. November 1987.
 1998/2a

	page
Introduction (A. S. Szabó)	11
Opening speech (Sz. Török)	13
Plenary lectures	14
1. P. Biacs, I. Kiss: The role of radiation technique in the bio- technology	14
2. I. Pál: The role of radiation-effects in the plant physiological processes	21
Lectures in working groups	29
I. Low dose application, stimulation chairman: J. Simon	29
1. J. Simon: Report about the activity of the ESNA Stimulation Working Group and Scientific trends of the low-does Application	30
2. A. S. Szabó: Radiation effect of the Chernobyl accident on the plants in Hungary	32
3. M. A. Tejada, A. S. Szabó, J. Simon, F. Hajdú: Effect of light- stimulation on the ascorbic acid content of horticultural plants	34
4. I. Pál: The effect of light-treatment with different wavelengths on the development of paprika (<i>Capsicum Annum</i>) raised in growth chamber	36
5. Zs. Mednyánszky, M. A. J., Tejada, A. S. Szabó: The change of enzyme – activity of some horticultural products after treatment by light – stimulation equipment	39
6. M. A. J. Tejada, A. S. Szabó: Effect of light – stimulation on tomato development	41
7. S. Gáspár, J. Simon: Results of small and big plot field experiments with seeds treated by AGROLUX procedure before sowing in 1986-1987	43

	page
8. I. Pál: Information about the seminar “Importance of radiobiotechnology in the plant breeding” held in Kishinev (USSR), 12-16 Oct. 1987	46
II. Radiomutation, chairman: K. Pásztor	48
1. J. Lazányi: Recurrent selection for use of micro-mutants in breeding programs	49
2. P. Pepó, P. Pepó: Application of neutron irradiation on maize improvement	51
3. E. Kiss, A. Bálint: Investigation for selection in wheat using ^{15}N	53
4. K. Pásztor: Experiences of basic material research by gamma and neutron irradiation	57
5. V. Kovács, E. Virágh, I. Gyurján, Á. Keresztes: Irradiation of barley seeds with fast neutrons	60
6. I. Murányi, Gy. Szalai: Production of winter barley mutants via long-term gamma irradiation	64
III. Preservation by irradiation, chairman: J. Farkas	66
1. J. Farkas: World-wide progress in food irradiation	67
2. B. Kálmán: Report on the annual meeting of the International Consultative Group on Food Irradiation (ICGFI)	68
3. J. Beczner, I. Kiss, J. Kispéter: The identification of irradiation of food by chemiluminescence	71
4. J. Kispéter, Zs. Rózsa, L. Kiss, J. Beczner: Investigation of irradiation of foodstuffs by thermoluminescence method	73
5. J. Farkas, Á. Koncz, M. Kristianová, É. Sipőcz, M. M. Sharif: Preliminary experiments identification of irradiated dry ingredients on the basis of starch-modification	75
6. E. Kovács, J. Kovács, Á. Keresztes: Preliminary experiments for identification of radiation treatment in fruits	76
7. J. Farkas, É. Andrásy: Effect of gamma irradiation on the heat-sensitivity of bacterial spores	79
8. M. A. J. Tejada: Decontamination of animal feed by irradiation	81
9. P. Hargittai, Á. Kovács: Decontamination of spices by electron beam irradiation	83

	page
IV. Radioecology, isotope technique, chairman: A. S. Szabó	86
1. J. Pigler: Food control system, with special attention on the radioactive contamination	87
2. B. Kiss: Investigation of foodstuffs for radioactive contamination	90
3. Daróczy, A. Bolyós, Z. Dezső, Á. Pázsit, M. Nagy: Mapping of the Chernobyl fall-out on the basis of the radioactivity in mosses	92
4. A. S. Szabó: Influence of the increased radioactive contamination level on the plants	95
5. E. Virágh: New basic principles in radiation protection	97
6. J. Dombovári, M. Oncsik: Investigation of the influence of soil and plant contaminations	99
7. A. Osztóics, Gy. Füleki, T. Varró: Application of the principles of isotope dilution in the determination of phosphorus isotope exchange in soils	101
8. M. Csajkai: Trace elements determination in food with neutron activation analysis	106
9. A. S. Szabó: Determination of vanadium in soil and plant samples using INNA method	108
10. B. Sas: Highly sensitive radioimmuno analytical (RIA) determination of chloramphenicol (CAP) – as a dangerous food polluting drug residue –in animal tissues	110
11. A. S. Szabó: Determination of boron in plant samples with non-destructive neutron activation	113
12. P. Szerbin, D. K. Popov: ^{226}Ra , ^{228}Ra and ^{228}Th in agricultural food chains	115
13. L. Zsoldos, B. Nagy, S. Bernáth, E. Palágyi, I. Pais: Investigation of uptake and distribution of titanium compounds in chickens with ^{44}Ti radioisotope	117
14. Gy. Pethes, P. Rudas: Accumulation and elimination of radiocontamination from different tissues of broiler chickens and rabbits fed with known amounts of radiocesium	120
Closing ideas (A. S. Szabó)	123

 RADIATION TECHNIQUE
 IN THE AGRICULTURE AND FOOD SECTOR
 4th Symposium University of Horticultural and Food Industry
 University College of Food Engineering of Szeged
 24-24. October 1991.
 1992/2a.

	page
Introduction (J. Kispéter)	9
Opening speech	10
 Plenary lecture	
F. Kőrösi: Theoretical principals of the effects of electromagnetic waves exerted on the agricultural living organisms, and the main lines of their applications	11
 Lectures in working groups	
I. Agricultural	
Chairmen: J. Dombovári, J. Simon, A.S. Szabó, F. Zsoldos	
1. Bujtás: Simultaneous measurement of heavy metal- and potassium transport in plant using double radioactive label	42
2. J. Dombovári, M. Oncsik: ^{134}Cs activity of plants in connection with length of exposure to contamination	48
3. E. Hajdú, F. Kőrösi, E. Jezierska-Szabó: Test for radiation-sensitivity of grapevine varieties	50
4. E. Kurtács, B. Kanyár: Uptake of ^{110}Ag by fish in laboratory circumstances	53
5. Mázik-Tőkei: Effect of gamma-irradiation on the yield components of different pea varieties	57
6. Zs. Mednyánszky, A. S. Szabó: Influence of light-technique treatment on the preservation of vegetables and fruits	61
7. Zs. Mednyánszky, A. S. Szabó, J. Simon: Effect of light stimulation treatment on chemical composition in horticultural plants	64
8. T. Németh, Gy. Baczó: Nitrogen uptake of maize undisturbed soil column experiments	66
9. T. S. Hoang Németh, P. Szerbin, D. Stur, F. Kőrösi: ^{110}Ag uptake by <i>pisum sativum</i> - a survey of several influencing factors	69

	page
10. E. Osztóics, Gy. Füleky: Kinetics of ^{32}P -exchange in soils	72
11. P. Károly: Mutagen effect of gamma-rays and their application in the research of basic genetic population of maize	75
12. J. Simon: Results of stimulation investigation with Stimokomplex technique in green-house and field experiments and plant tissue breeding	78
13. A. S. Szabó: Some special question of the radioecological research	82
14. A. S. Szabó, Zs. Mednyánszki, J. Simon: Effect of light-technique treatment on the yield-increase of horticultural plants	86
15. P. Szerbin, E. Koblinger-Bokori, F. Nándor, L. Kovács, A. Ugron: migration of ^{137}Cs and ^{90}Sr from Chernobyl fallout in different soil types in the 1987-1990 period	89
16. S. Tarján: Effect of the Chernobyl disaster on the contamination of foodstuffs in Hungary (1986-1991)	94
17. F. Zsoldos, É. Vashegyi: Studies on environmental factors affecting the toxicity of nitrit by cereals	100

II. Food Industry

Chairmen: B. Kálmán, P. László

1. B. Bánáti, J. Farkas, É. Andrásy: Extension of shelf-life of refrigerated meat products by combined application of irradiation and other anti-microbial factors	104
2. J. Farkas, S. Barabássy, L. Somogyi, K. Kaffka: Methods for identification of irradiated foodstuffs and dry food ingredients	109
3. J. Felföldi, P. László: Dielectric method for measuring of irradiation treatment of potatoes	112
4. P. Greguss: Applicability of ultrasound in the food industry	117
5. J. Huszti: Application of nuclear measuring methods	120
6. B. Kálmán: The possibilities and problems of the industrial food irradiation in Hungary	122
7. J. Kispéter, L. Kiss, L. Horvát: The investigation of irradiation of powdered foodstuffs with thermoluminescence and electron spin resonance methods	125
8. I. Kiss, J. Beczner, G. Balla: New results on the field of food irradiation in the Central Research Institute	128
9. P. Lénárd: Nuclear Instruments in the Sugar Industry Isotope	133
10. A. Sveczer, M. Shadlia, I. Kiss: The effect of irradiation on the shelf-life of packed, sliced beef meat	136

	page
11. J. Simon: Application of Synergolux technique in the agriculture, food industry and environmental protection	140
Posters	
F. Kőrösi, E. Jezierska-Szabó, P. Szőke, P. László, J. Zana, J. Felföldi: Repairing, Recocery and Overcompensating Processes During ontogenesis, after X-ray irradiation of Bean Seeds	144
F. Kőrösi, E. Jerzierska-Szabó, P. Szőke, Á. Máthé: Repairing, Recocery and Overcompensating Processes During ontogenesis, after X-ray irradiation of Bean Seeds	147
E. Jezierska, F. Kőrösi, L. Bojcennyu: Growth and development of wheat embryo in embryo-culture under the influence of polarized light	149
E. Jezierska, F. Kőrösi, L. Bojcennyu: Growth and development of wheat embryo in embryo-culture as affected by gamma-irradiation	152
Closing ideas (J. Kispéter)	154
International Conference on Food Physics	155

 RADIATION TECHNIQUE
 IN THE AGRICULTURE AND FOOD SECTOR
 5th Symposium University for Agricultural Sciences Gödöllő
 29-30. August 1995.

	page
Opening lecture (Kőrösi Ferenc)	1
Wecoming speech (Kocsis Károly)	4
Plenari lecture: Simon József: Past and future of the radiation technique in the food sector	5
Application of the radiation technique in the agriculture	13
I. section: Effects of ionizing radiations Chairman: Kispéter József	
Kőrösi Ferenc, Hajdú Edit: Radiosensitivity of plants with special regard to vine grape	14
Szöke Pál, Kőrösi Ferenc, Hajdú Edit: Netto photosynthesis of two vine grape varieties as affected by X-ray irradiation	25
II-III. section: Isotope tracer techniques, effects of non-ionizing radiation	30
Chairman: Simon József	
Dombovári János, Oncsik Mária, Szilvássi László: Studies on release of effective agent of ¹³ C isotope labeled granulated herbicides	31
Szendrő Péter, Koltay Jenő, Vincze Gyula: Irradiation of seeds by electromagnetic corona discharge	36
Tolnay Pál, Simon József, Szabó S. András: Investigation of application of SYNERGOLUX technique on the storability of some fruit	42
IV. section: Radiomutation	48
Chairman, chairwoman: Simon József, Hajósné Novák Márta	
Némethné Hoang T.S., Thúröczy György, Szabó D. László: Influence of magnetic field, microwave and ultraviolet exposure on germination of seed	49
Mázikné Tőkei Katalin: Radiation techniques in plant breeding	53
Pásztor Károly: Production and utilization of mutants in the genetic improvement of maize	63

Pepó Péter, Pepó Pál, Tóth Szilárd: Mutagenic raw materials in corn breeding produced by Cyclotron	73
Hajósné Novák Márta, Dallmann Géza, H. Nagy Anna, Bálint Andor: Morphological and biochemical investigation of tetraploid W117 maize sublimes produced by colchicin treatment and gamma irradiation	78
Application of the radiation technique in the food sector	84
V. section	
Chairman: László Péter	
Szabó S. András, László Péter: Food science, food physics, radiation technique in the food sector	85
Kispéter József: Detection of the irradiation of foodstuffs by physical methods	93
Kis László, Kispéter József: High-temperature thermoluminescence of protein-containing food industrial products	100
Felföldi József, Kiss Balázs, Kiss László Iván, Kispéter József: Investigation of irradiation by impedancia measurement	102
Kiss István, Formanek Zoltán, Polyákné Fehér Katalin, Farkas József: Effect of ionizing radiation on organoleptic and some chemical properties of cheeses	109
Kovács Etelka: Effect of the irradiation on the rheological properties of fruits	114
Szabó S. András: Application of activation analysis for food investigation	122
Mednyánszky Zsuzsa, Szabó S. András, Korány Kornél: Investigation of aroma compounds of irradiated pepper by GC-MS technique	128
VI. section: Radioecology	137
Chairman: Szabó S. András	
Szabó S. András, Szerbin Pével: Some actual questions of radioecology	138
Vincze Gyula: Determination of integrated activity for metabolism by open systems	144
Oncsik Mária, Dombóvári János: Contamination experiments with Lucerne	149
Closing remarks (Kőrösi Ferenc)	153
2nd International Conference on Food Physics	155

Greeting	3
Editorial	4
 Original papers	
B. Gion, J. Barta: Processing of dried cubes and flour from Jerusalem artichoke	5
P. László, Wilko K. van Loon, Izaak A. van Hagenhem: Measurement of the thermal conductivity of the food products	15
Cs. Balla, Kné. Koncz: Investigation of the ripening process of apricot fruit by coloration	23
 Short communications	
J. Felföldi: Firmness assessment of fruits and vegetables on the base of the acoustic	35
A. S. Szabó: Determination of elemental composition of dried tomato by neutron activation analysis	47
Kné. Koncz, T. Sáray, R. Jóri: Viscosimetry characteristics of watermelon stored under cold conditions	51
 Global reviews	
N. Sándor, Zs. Németh, Gy. Rácz: Investigation of foaming of food products. I. Drinks	64
N. Sándor, Zs. Németh, Gy. Rácz: Investigation of foaming of food products. II. Proteins	83
A. S. Szabó: Some thoughts concerning the radioactive contamination of foodstuffs 10 years after the Chernobyl disaster	103
Conversation with P. Ormos	119
Information for the authors and lecturers	122

Greeting	3
Editorial	5
 Original papers	
Cs. Balla, K. Polyák-Fehér: Dimensions changes of some horticultural products during freezing	7
P. László, J. Zana, E. Kristóf: The rheological and sensory properties of cucumber varieties	21
J. Kispéter, L. I. Kiss, Dénes-Dobos G., L.I. Horváth: The application of physical methods for the complex investigation of the irradiation of black pepper	31
 Short communications	
A.S. Szabó, N.A. Gundorin: Investigation of macro composition of samples of animal origin using nondestructive activation analysis	39
Bajúsz-Kabók, K., J. Kispéter, Rauh, J., P. Záhonyi-Racs, E. Pintér: Application of rheological method for detection of the ionising treatment of blackpepper	47
J. Kispéter, I. Dékány, T. Marosi, L.I. Kiss: Microstructure of milk protein concentrate powder investigated by small angle X-ray scattering	55
 Global reviews	
Z. Lakner: Quality, competitiveness and food physics in Hungary	63
P. Tolnay, A.S. Szabó: Estimation of irradiated foodstuffs by Hungarian adult population (Preliminary communication)	77
A.S. Szabó: Food science education and research in USA at the Cornell University	83
Conversation with A.S. Szabó	97
Information for the authors and lectors	100

Greeting	3
Editorial	5
 Original papers	
P. László, E. Vozáry, J. Zana: Physical properties of the apple varieties during piking and storage	7
J. Kispéter, A. Koncz, M. Szín: Application of the TL method for identification of irradiation treatment in the case of various spices and fruits	15
F. Eszes, O. Dóka, J. Kispéter: Determination of the thermal diffusivity of egg Powders	28
 Short communications	
T. A. Rashevskaya: Influence of pectine of water and fatty phases states in butter	39
E. Vozáry: Change of electrical impedance parameters of apples stored in room temperature	45
K. Bajúsz-Kabók, Rauh, P. Záhonyi-Racs, J. Kispéter: Detection of ionizing treatment in soy protein with rheological methods and its effect on the final product	53
 Global reviews	
A. S. Szabó, P. Tolnay: Journal of Food Physics 1993-1997, another years period in the service of food physics	61
V. Kovács, Cs. Ferencz, Gy. Tarcsai, Sz. Pásztor, Zs. Mezei: Study of environment contamination remote and atomic spectroscopic detection of toxic heavy metals	67
N. Svyetlova, A. S. Szabó, P. László: Physical methods for investigation of plant origin	81
Conversation with I. Kiss	91
